1. Introduction to Due Diligence

What is Due Diligence?

Due diligence is the comprehensive investigation and analysis of a property before purchase. It's your opportunity to verify all claims, uncover hidden issues, and ensure the deal makes financial sense.

Why Due Diligence Matters

- Prevents costly mistakes (average bad deal costs $50,000+)

- Identifies repair needs before purchase
- Validates financial projections
- Uncovers legal issues
- Protects your investment
- Provides negotiation leverage

Due Diligence Timeline

- **Days 1-3**: Initial property walkthrough and preliminary analysis
- **Days 4-7**: Hire inspectors, order title search, gather financial documents
- **Days 8-14**: Review inspection reports, analyze financials, verify information
- **Days 15-21**: Hire attorney for legal review, negotiate repairs/price
- **Days 22-30**: Final walkthrough, final negotiations, close

---

2. Pre-Purchase Property Analysis

Initial Property Assessment

Property Type & Classification

- **Single-Family**: 1-4 units, typically easier to manage
- **Multi-Family**: 5+ units, economies of scale, more complex
- **Commercial**: Retail, office, industrial - different analysis
- **Mixed-Use**: Combination of residential and commercial

Property Condition Level

- **Excellent**: Newer construction, well-maintained, move-in ready
- **Good**: Minor cosmetic updates needed, solid bones
- **Fair**: Some repairs needed, functional systems
- **Poor**: Significant repairs needed, potential structural issues
- **Distressed**: Major rehab required, significant investment needed

Property Age & History

- **Year Built**: Older properties have more potential issues
- **Previous Owners**: How many? Why did they sell?
- **Previous Use**: Affects zoning, condition, potential issues
- **Renovation History**: What's been updated? What's original?
- **Damage History**: Any major damage or insurance claims?

Preliminary Financial Analysis

Income Potential

- **Current Rent**: What is tenant paying now?
- **Market Rent**: What could you charge for similar units?
- **Rent Growth**: Historical and projected rent growth
- **Other Income**: Parking, storage, laundry, pet fees
- **Vacancy Rate**: Local market vacancy (target 5-10%)

Expense Estimation

- **Property Taxes**: Review tax assessment, calculate annual tax
- **Insurance**: Get insurance quote
- **Utilities**: Review utility bills (if available)
- **Maintenance**: Budget 8-12% of gross income
- **HOA Fees**: If applicable
- **Vacancy**: Budget 5-10% of gross income

Quick Financial Screening

```
PRELIMINARY DEAL ANALYSIS
Property Address: _____
Purchase Price: $_____
Annual Gross Income: $_____
Annual Expenses (estimated): $_____
Net Operating Income: $_____
Cap Rate: _____%
Cash-on-Cash Return: _____%

Does this meet your investment criteria?
[ ] Yes - Proceed to full due diligence
[ ] No - Pass on property
```

---

3. Physical Inspection & Condition Assessment

Hiring an Inspector

What to Look For

- Licensed and insured
- Experience with investment properties
- Detailed written reports
- Willingness to explain findings
- References from other investors
- Cost: $300-800 for residential

What the Inspector Should Cover

- Structural integrity
- Roof condition
- HVAC systems
- Plumbing and electrical

- Foundation and drainage
- Windows and doors
- Interior walls and flooring
- Appliances
- Safety systems (smoke/CO detectors)

Roof Inspection

What to Check

- **Age**: Typical lifespan is 15-25 years (varies by material)
- **Material**: Asphalt shingles, metal, tile, flat roof
- **Condition**: Missing shingles, curling, moss/algae growth
- **Leaks**: Water stains on ceiling/attic
- **Flashing**: Around chimneys, vents, skylights
- **Gutters**: Clogged, damaged, or missing

Repair Costs

- Roof repair (small area): $500-2,000
- Roof replacement (full): $8,000-25,000 (varies by size/material)
- New gutters: $1,500-5,000

Red Flags

- Roof older than 20 years
- Multiple layers of shingles
- Visible leaks or water damage
- Sagging roof line
- Moss or algae growth (indicates moisture)

Foundation & Structure

What to Check

- **Cracks**: Hairline vs. significant structural cracks
- **Settling**: Uneven floors, doors not closing properly
- **Water Damage**: Efflorescence (white powder), moisture
- **Basement/Crawlspace**: Moisture, mold, pest damage
- **Grading**: Water should drain away from foundation

Repair Costs

- Foundation crack repair: $500-2,000
- Waterproofing: $3,000-10,000
- Major foundation repair: $20,000+

Red Flags

- Horizontal or diagonal cracks (structural concern)
- Bowing walls
- Significant water damage or mold
- Pest damage (termites, carpenter ants)
- Poor grading causing water pooling

HVAC Systems

What to Check

- **Age**: Typical lifespan is 15-20 years
- **Type**: Furnace, heat pump, window units
- **Condition**: Rust, corrosion, visible damage
- **Maintenance**: When was last service?
- **Efficiency**: SEER rating (higher is better)
- **Noise**: Unusual sounds indicate problems

Repair Costs

- HVAC repair: $500-2,000
- HVAC replacement: $5,000-15,000

Red Flags

- System older than 15 years
- Rust or corrosion
- Unusual noises
- Inconsistent heating/cooling
- No maintenance records

Plumbing & Electrical

Plumbing Check

- **Pipes**: Copper, PVC, or old galvanized (problematic)
- **Water Pressure**: Should be 40-80 PSI
- **Drainage**: Slow drains indicate problems
- **Water Heater**: Age, type, condition
- **Leaks**: Under sinks, around toilets, in basement

Electrical Check

- **Panel**: 100-200 amp service (200+ preferred for modern use)
- **Outlets**: Grounded, no exposed wiring
- **Breakers**: Properly labeled, no double-breakers
- **Wiring**: Copper preferred, aluminum problematic
- **Age**: Older wiring may need replacement

Repair Costs

- Plumbing repair: $500-2,000
- Plumbing replacement: $10,000-30,000

- Electrical repair: $500-2,000
- Electrical panel upgrade: $3,000-8,000

Red Flags

- Galvanized pipes (need replacement)
- Aluminum wiring (fire hazard)
- Outdated electrical panel
- Insufficient electrical service
- Evidence of water damage or leaks

Interior Condition

Flooring

- **Type**: Hardwood, carpet, tile, vinyl
- **Condition**: Stains, damage, wear patterns
- **Age**: How long will it last?
- **Repair Cost**: Carpet $1-3/sqft, hardwood$5-10/sq ft

Walls & Paint

- **Condition**: Cracks, holes, water stains
- **Paint**: Lead paint (pre-1978 homes)?
- **Mold**: Any visible mold or mildew?
- **Repair Cost**: Painting $1-3/sqft, drywallrepair$500-2,000

Appliances

- **Age**: Typical lifespan: refrigerator 10-15 years, stove 10-15 years, dishwasher 8-12 years
- **Condition**: Functional, cosmetic issues
- **Replacement Cost**: $500-2,000 per appliance

Windows & Doors

- **Type**: Single-pane, double-pane, storm windows
- **Condition**: Broken seals, cracks, rot
- **Locks**: Functional security
- **Replacement Cost**: $300-1,000 per window

---

4. Financial Analysis & Deal Metrics

Income Analysis

Rent Verification

- Verify current rent with lease agreement
- Compare to market rent for similar units
- Research rent growth trends (typically 2-3% annually)
- Identify any below-market rents (opportunity)
- Check for rent control restrictions

Rental Income Calculation

```
MONTHLY RENTAL INCOME
Unit 1: $_______ × 12 = $_______
Unit 2: $_______ × 12 = $_______
Unit 3: $_______ × 12 = $_______
Gross Annual Income: $_______

Less Vacancy (5-10%): $_______
Effective Gross Income: $_______
```

Other Income Sources

- Parking fees: $25-100/month per space
- Storage units: $25-75/month

- Laundry: $100-300/month per property
- Pet fees: $25-50/month
- Utility reimbursements

Expense Analysis

Operating Expenses

Obtain last 2-3 years of actual expenses from seller:

Expense Category	Typical % of Income	Annual Amount
Property Taxes	10-15%	$_____
Insurance	5-8%	$_____
Maintenance	8-12%	$_____
Utilities	5-10%	$_____
Management	8-12%	$_____
Vacancy	5-10%	$_____
Repairs	5-10%	$_____
Legal/Admin	2-3%	$_____
Total	**50-80%**	**$_____**

Red Flags in Expenses

- Expenses significantly below market (seller may be deferring maintenance)
- Expenses significantly above market (operational inefficiency)
- Missing expense categories (seller may be hiding costs)
- No documentation (verify with receipts)

Key Investment Metrics

Cap Rate (Capitalization Rate)

```
Cap Rate = Net Operating Income / Property Value

Example:
NOI: $20,000
Property Price: $250,000
Cap Rate: $20,000 / $250,000 = 8%

Target Cap Rate: 8-12% (varies by market)
```

Cash-on-Cash Return

```
Cash-on-Cash Return = Annual Cash Flow / Cash Invested

Example:
Annual Cash Flow: $12,000
Cash Down Payment: $50,000
Cash-on-Cash Return: $12,000 / $50,000 = 24%

Target: 15-25%
```

Debt Service Coverage Ratio (DSCR)

```
DSCR = Net Operating Income / Annual Debt Service

Example:
NOI: $20,000
Annual Mortgage Payment: $15,000
DSCR: $20,000 / $15,000 = 1.33

Lender Requirement: 1.2-1.5 minimum
```

Price-to-Rent Ratio

```
Price-to-Rent Ratio = Property Price / Annual Rent

Example:
Property Price: $200,000
Annual Rent: $24,000
Price-to-Rent: $200,000 / $24,000 = 8.3

Interpretation:
< 15 = Good investment
15-20 = Fair investment
> 20 = Poor investment
```

Cash Flow Analysis

```
ANNUAL CASH FLOW ANALYSIS
Gross Rental Income: $________
Less: Vacancy Loss: $________
Effective Gross Income: $________

Operating Expenses:
  Property Taxes: $________
  Insurance: $________
  Maintenance: $________
  Utilities: $________
  Management: $________
  Other: $________
Total Operating Expenses: $________

Net Operating Income: $________
Less: Debt Service: $________
Annual Cash Flow: $________

Monthly Cash Flow: $________ ÷ 12 = $________
```

---

5. Legal & Title Review

Title Search

What to Look For

- **Clear Title**: No liens, encumbrances, or claims
- **Previous Owners**: How many? How long did they own?
- **Judgments**: Any legal judgments against property?
- **Tax Liens**: Any unpaid property taxes?
- **Mortgage Liens**: Any outstanding mortgages?
- **HOA Liens**: Any unpaid HOA fees?

Red Flags

- Multiple owners in short time (property flipping)
- Foreclosure history
- Tax liens
- Judgment liens
- Unclear ownership
- Boundary disputes

Zoning & Land Use

Zoning Verification

- Confirm current zoning allows intended use
- Check for zoning restrictions or limitations
- Verify setback requirements
- Check parking requirements
- Review height restrictions

Land Use Restrictions

- Deed restrictions (permanent limitations)
- Easements (right of way for utilities, etc.)
- Covenants (restrictions on property use)
- Conservation easements (environmental restrictions)

HOA Documents (if applicable)

Review HOA Covenants

- Restrictions on rental (some prohibit rentals)
- Pet restrictions
- Exterior modification restrictions
- Parking restrictions
- Noise restrictions

HOA Financials

- Review HOA budget and reserves
- Check for special assessments
- Verify HOA fee amount and history
- Assess financial health of HOA
- Check for pending major repairs

Red Flags

- HOA prohibits rentals
- Underfunded reserves
- Recent special assessments
- Poor HOA financial health
- Restrictive rules that limit rental appeal

Environmental Issues

Environmental Hazards to Check

- **Mold**: Any visible mold or water damage?
- **Asbestos**: Older properties may contain asbestos
- **Lead Paint**: Pre-1978 homes must disclose lead paint
- **Radon**: Test for radon (colorless, odorless gas)
- **Underground Tanks**: Old oil tanks, septic systems
- **Contamination**: Industrial history, dry cleaners nearby

Phase I Environmental Assessment

- Recommended for commercial or industrial properties
- Identifies potential environmental issues
- Cost: $1,000-3,000
- Can reveal serious problems

---

6. Market & Location Analysis

Neighborhood Analysis

Economic Indicators

- **Employment**: Major employers in area? Job growth?
- **Income Levels**: Median household income
- **Population Growth**: Growing or declining?
- **School Quality**: Good schools attract tenants
- **Crime Rate**: Check local crime statistics

Neighborhood Trends

- **Appreciation**: Historical price appreciation

- **Rent Growth**: Historical rent growth
- **Development**: New developments, infrastructure
- **Gentrification**: Improving neighborhoods attract investment
- **Decline**: Declining neighborhoods present risk

Comparable Sales Analysis

- Research 3-5 comparable properties
- Compare price per square foot
- Compare cap rates
- Identify market trends
- Validate asking price

Location Factors

Tenant Appeal

- Proximity to employment centers
- Public transportation access
- Shopping and dining nearby
- Parks and recreation
- School quality
- Safety and walkability

Rent Potential

- Compare to similar properties in area
- Research market rent trends
- Identify rent growth opportunities
- Consider tenant demand
- Evaluate competitive landscape

Market Conditions

Buyer's vs. Seller's Market

- **Buyer's Market**: More inventory, lower prices, more negotiating power
- **Seller's Market**: Less inventory, higher prices, less negotiating power
- **Balanced Market**: Equilibrium between supply and demand

Interest Rate Impact

- Rising rates: Reduce property values, reduce buyer demand
- Falling rates: Increase property values, increase buyer demand
- Lock in rate before rate changes

---

7. Red Flags & Deal Killers

Major Red Flags

Structural Issues

- Significant foundation cracks
- Bowing walls
- Settling (uneven floors, doors not closing)
- Roof damage or leaks
- Termite or pest damage

Environmental Issues

- Mold (especially black mold)
- Lead paint (if not properly disclosed)
- Radon contamination
- Underground storage tanks
- Contaminated soil

Financial Red Flags

- Expenses significantly below market (deferred maintenance)
- Negative cash flow
- Cap rate below 6% (overpriced)
- Price-to-rent ratio above 20 (overpriced)
- Seller won't provide expense documentation

Legal Issues

- Title defects or unclear ownership
- Zoning violations
- HOA restrictions on rentals
- Pending litigation
- Code violations

Market Red Flags

- Declining neighborhood
- High crime rate
- Declining employment
- Population decline
- Overbuilding in area

Deal Killer Checklist

- [ ] Structural damage requiring $20,000+ repairs
- [ ] Black mold or significant mold issues
- [ ] Roof needs replacement ($15,000+)
- [ ] Foundation issues
- [ ] Negative cash flow
- [ ] Cap rate below 5%
- [ ] Zoning prohibits intended use

- [ ] HOA prohibits rentals
- [ ] Title defects
- [ ] Declining neighborhood
- [ ] Seller won’t provide documentation
- [ ] Environmental contamination

---

8. Due Diligence Checklist

Pre-Purchase Checklist

PROPERTY INFORMATION

- [ ] Property address and legal description
- [ ] Property type (single-family, multi-family, etc.)
- [ ] Year built and square footage
- [ ] Number of units/bedrooms/bathrooms
- [ ] Lot size and zoning

FINANCIAL ANALYSIS

- [ ] Current rent verified with lease
- [ ] Market rent researched
- [ ] 2-3 years of actual expenses obtained
- [ ] Cap rate calculated (target 8-12%)
- [ ] Cash-on-cash return calculated (target 15-25%)
- [ ] DSCR calculated (lender requirement met)
- [ ] Price-to-rent ratio calculated (target <15)

PHYSICAL INSPECTION

- [ ] Professional home inspection completed
- [ ] Roof condition assessed (age, condition)
- [ ] Foundation inspected (no major cracks)

- [ ] HVAC system inspected (age, condition)
- [ ] Plumbing inspected (no major issues)
- [ ] Electrical system inspected (adequate service)
- [ ] Appliances inspected (age, condition)
- [ ] Windows and doors inspected
- [ ] Interior condition assessed
- [ ] Mold inspection completed (if concerns)
- [ ] Radon test completed (if applicable)
- [ ] Pest inspection completed

LEGAL & TITLE

- [ ] Title search completed
- [ ] Clear title verified (no liens)
- [ ] Zoning verified (allows intended use)
- [ ] HOA documents reviewed (if applicable)
- [ ] Deed restrictions reviewed
- [ ] Environmental assessment completed (if needed)
- [ ] Permits and violations checked

FINANCIAL DOCUMENTATION

- [ ] Seller’s expense documentation reviewed
- [ ] Lease agreements reviewed
- [ ] Utility bills reviewed
- [ ] Tax assessment verified
- [ ] Insurance quote obtained
- [ ] Financing pre-approval obtained

MARKET ANALYSIS

- [ ] Comparable sales researched
- [ ] Neighborhood analyzed

- [ ] Rent growth trends researched
- [ ] Employment data reviewed
- [ ] School quality assessed
- [ ] Crime statistics reviewed

FINAL WALKTHROUGH

- [ ] Final inspection completed
- [ ] Condition matches previous inspection
- [ ] No new issues discovered
- [ ] Repairs/credits negotiated
- [ ] Ready to close

---

9. Making the Final Decision

Investment Decision Framework

Does It Meet Your Criteria?

- [ ] Cap rate within target range (8-12%)?
- [ ] Cash-on-cash return within target (15-25%)?
- [ ] Location acceptable?
- [ ] Condition acceptable?
- [ ] No major red flags?
- [ ] Financing available?
- [ ] Fits your investment strategy?

Risk Assessment

Low Risk: Strong metrics, good location, good condition, no red flags **Medium Risk**: Acceptable metrics, some concerns, manageable issues **High Risk**: Weak metrics, multiple concerns, significant issues

Negotiation Strategy

- Use inspection findings to negotiate repairs or price reduction
- Compare to comparable sales to justify offer
- Present financial analysis showing cap rate
- Get multiple quotes for major repairs
- Use market conditions to your advantage

Final Decision Checklist

```
FINAL INVESTMENT DECISION

Property: _____________________
Purchase Price: $___________
Target Cap Rate: _______%
Actual Cap Rate: _______%
Target Cash-on-Cash: _______%
Actual Cash-on-Cash: _______%

DECISION: [ ] BUY [ ] PASS

Reason: ___________________________
```

Conclusion

Due diligence is the foundation of successful real estate investing. By thoroughly analyzing properties before purchase, you'll:

- Avoid costly mistakes
- Identify opportunities
- Negotiate better deals
- Maximize returns
- Protect your investment

Remember: The best deal is the one you don’t make. If something doesn’t feel right, pass and move on to the next opportunity.
